INDUSTRIES

**Consistency You  
Can Count On**

Mfg. and Exporter of Brass Rods, Ingots, Brass Hollow Rods &  
Precision Turned Parts & Components of Brass & Copper

# COMPANY PROFILE

**Raj Metallurgical Industries** is a leading manufacturer and supplier of premium Brass Rods, Ingots, Brass Hollow Rods, Precision-Turned Brass and Copper Components, and exquisitely designed Faucets, renowned for their durability, reliability, and exceptional performance. With decades of expertise in brass and copper metallurgy, we leverage state-of-the-art technology and high-grade materials sourced from certified vendors to deliver products that meet stringent international standards, including **ISO 9001:2015**. Our diverse portfolio caters to industries such as automotive, electronics, plumbing, and luxury home décor, offering customized solutions in various sizes, shapes, and specifications to precisely meet client needs. Committed to uncompromising quality, we enforce rigorous quality control at every production stage, ensuring flawless products that consistently exceed expectations. **Raj Metallurgical Industries** embraces sustainable manufacturing practices, minimizing environmental impact through efficient resource use and waste reduction. Serving a global clientele, we combine competitive pricing, timely delivery, and exceptional customer service to foster enduring partnerships and drive demand worldwide. Guided by a vision to lead the industry through innovation and customer-centricity, **Raj Metallurgical Industries** is your trusted partner for superior brass components and faucets, blending functionality, durability, and aesthetic excellence.

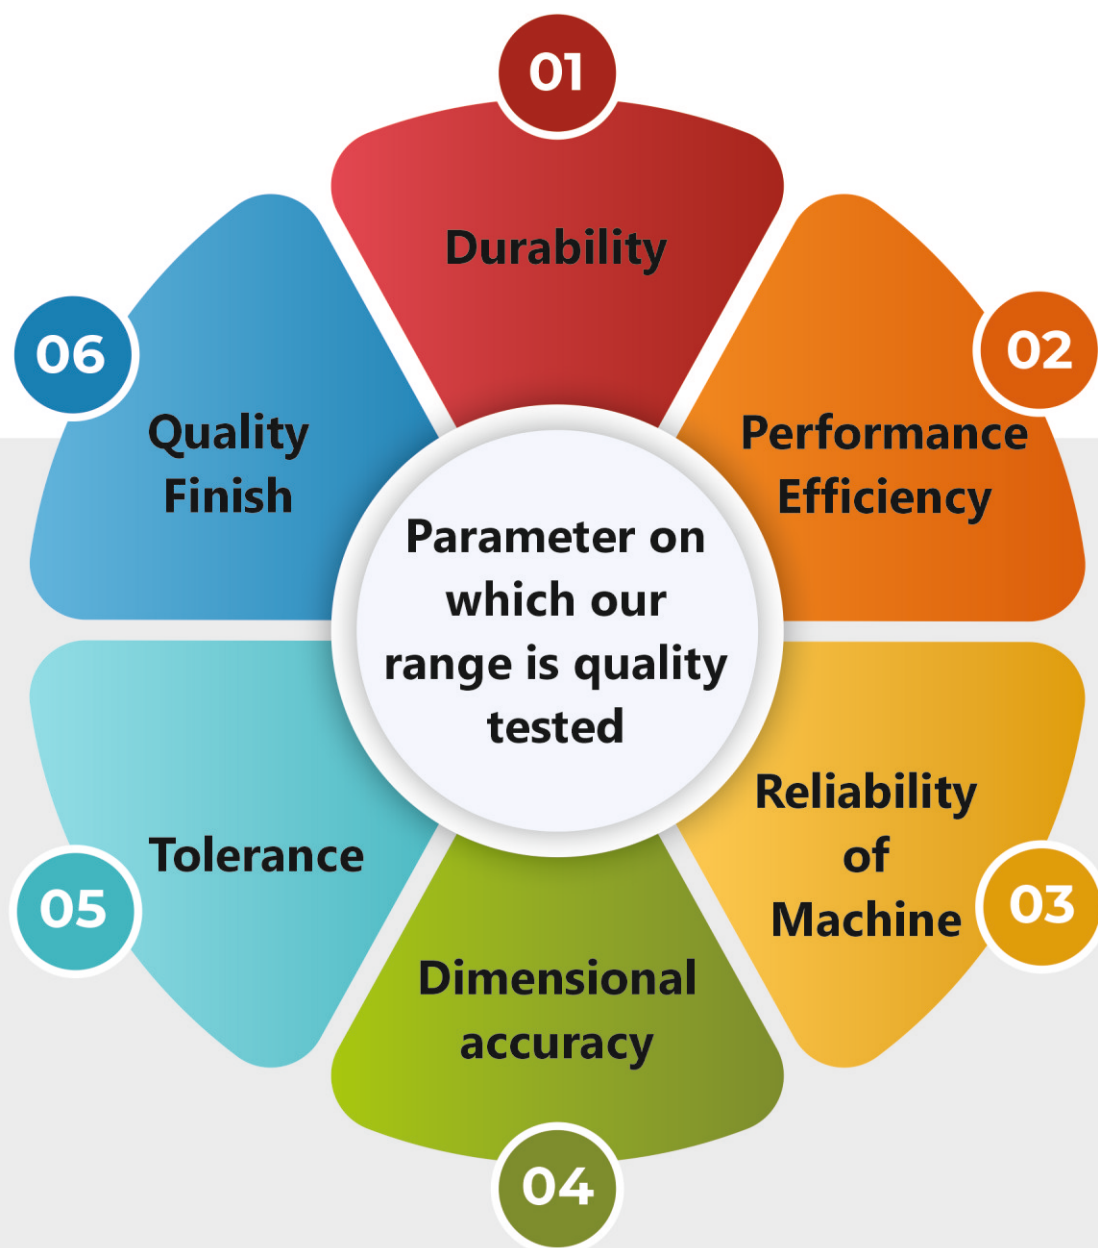

***Innovation in Every Turn***

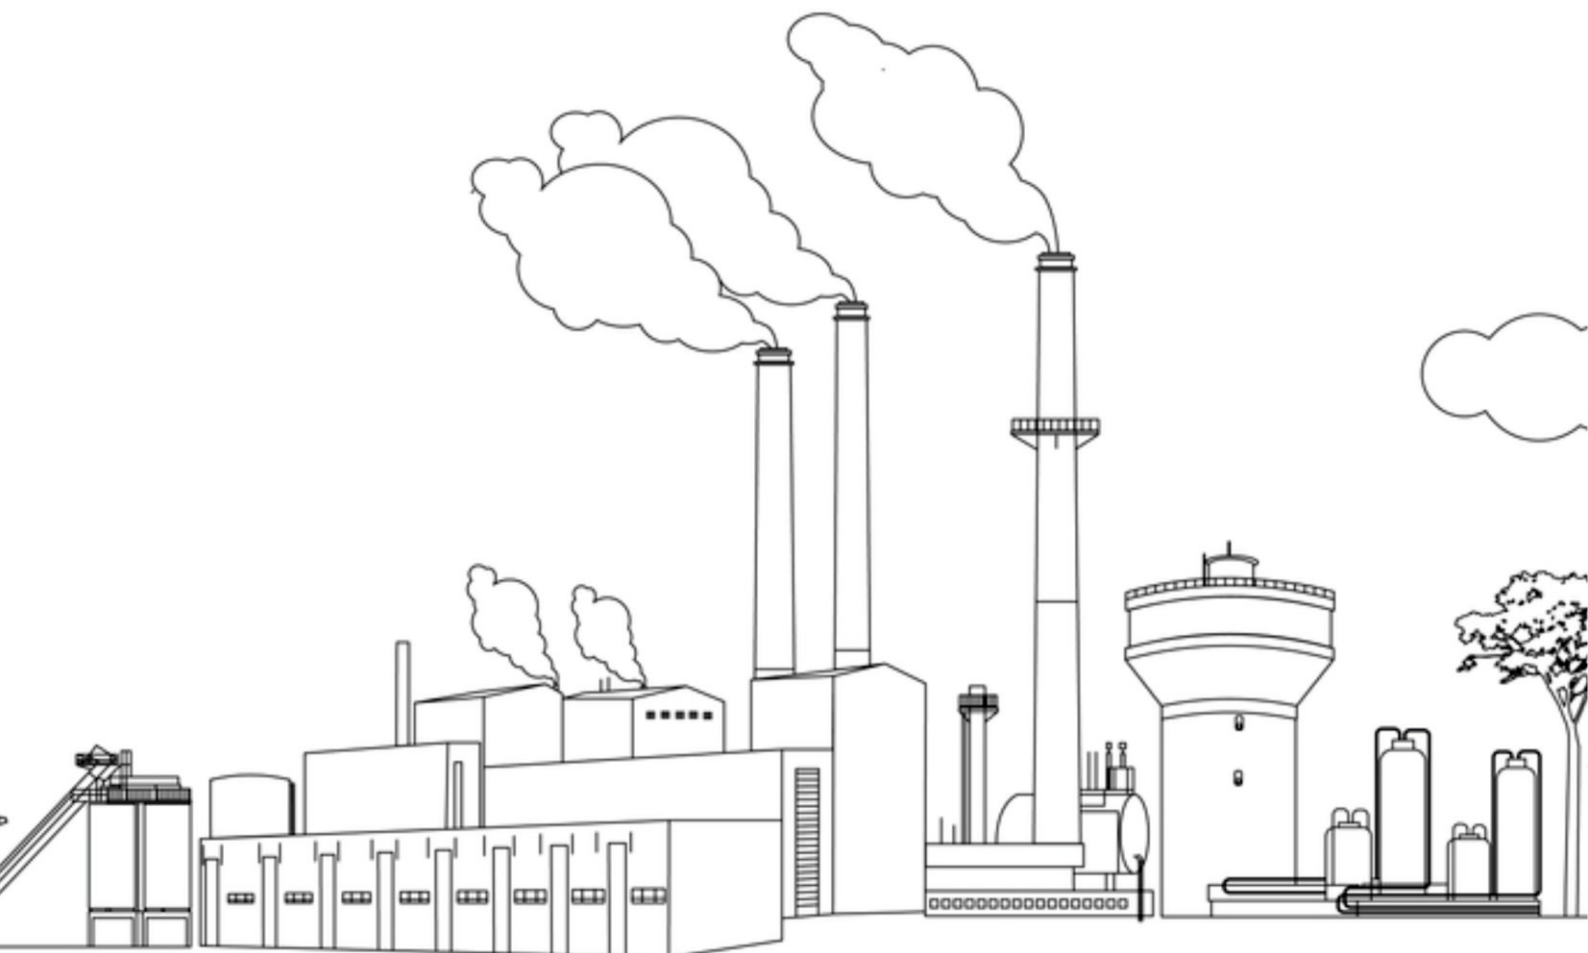

# **QUALITY POLICY**

Ever since our inception, we are committed in delivery quality array like Brass, Copper Alloy, Brass Casting, Precision Turned Parts etc. The range is quality checked on varied parameters to match the standards set by our industry experts.

## OUR INFRASTRUCTURE SETUP

We are blessed with a modern infrastructural setup, which is spread across a wide area. We have equipped it with the latest and sophisticated machinery, such as continue casting, C.N.C. machines, lathe, bending, cutting, granding and buff machines, electroplating machinery, laser marking machine *etc.* The machine is upgraded time to time to increase its manufacturing capacity. Our highly proficient and experienced technicians handle the machines with proficiency and gives desired shape & design to the product. Further, they are capable of manufacturing the range as per client specifications and attain their total satisfaction.

# **MANUFACTURING CAPABILITY**

A ton ELECTROTHERM furnace and Extrusion Press with monthly capacity 200 ton for brass rods and hollow rods which we are using for our in-house mfg. process for brass components.
